

## 4-STUDS GRIPPING

**AN AGILE AND ECONOMICAL  
GRIPPING SYSTEM**

# 4-STUDS GRIPPING

## AN AGILE AND ECONOMICAL GRIPPING SYSTEM

### FONCTION

The 4-stud clamping is an agile and economical gripping system. Thanks to its **two adjustment bars**, it allows **bottles of all sizes** and shape to be kept in a **centered position**.

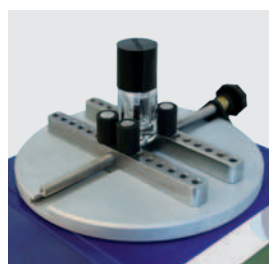

### THERE ARE TWO TYPES OF STUDS:

- **The smooth studs**

allow a quick change of position to the ideal in case of small successive series with very different diameters.

- **The screw studs**

are intended for medium and large series and offer better stability for high torque.

### TECHNICAL INFORMATION

Specifications	SMOOTH PLOTS	SCREW PLOTS
Tightening Mini-Maxi	Ø 7 à 185 mm	
Diameter of the tray	180 mm	
Clutter off l x lg	210 mm x 180 mm	
Useable on traction bench	No	
Useable on compression bench	Yes	
Reference	88 000 03	88 000 06
